## AWARDS AND HONORS

- Brazilian Society of Automatics' Best Student Paper Award at the 17th Brazilian Symposium on Intelligent Automation, 2025.
- Fellowship for Academic Excellence Program (PROEX), sponsored by the Brazilian Federal Agency for Support and Evaluation of Graduate Education (CAPES), 2024.
- **Honor of Merit Award for the highest GPA in the Control and Automation Engineering Class of '22 of the University of Brasilia, 2022.**
- Honorable Mention Award at the 28th Scientific Initiation Congress of UnB and 19th Congress of Scientific Initiation of Federal District, 2022.
- Fellowship for Scientific Initiation, sponsored by the National Council for Scientific and Technological Development (CNPq), 2021. **(Ranked 1st in the selection among all STEM students of the University)**
- Honorable Mention Award at the 27th Scientific Initiation Congress of UnB and 18th Congress of Scientific Initiation of Federal District, 2021.
- Honorable Mention Award at the 1st Federal District Mathematical Olympiad, 2017
- Honorable Mention Award at the 13th Brazilian National Mathematical Olympiad, 2017
- Silver Medal at the 15th Brazilian National Astronautics and Astronomy Olympiad, 2012.
- Bronze Medal at the 7th Brazilian National Mathematical Olympiad, 2012

## SELECTED SKILLS

### Languages

English (fluent); French (Upper-intermediate); Portuguese (native); Spanish (Upper-intermediate).

### Programming

C++ (Catch2/ Boost/ STL); C; Matlab; Python (Pandas/ Numpy/ Pytest/ SQLAlchemy); RISC-V assembly; SQL.

### General engineering tools

STK (Level 1); Simulink; Gpredict; LaTeX; SolidWorks; Autodesk Fusion 360; LTspice; Embedded GNU/Linux systems; Git.

---

## RESEARCH AND INDUSTRIAL EXPERIENCE

### Autotrac

02/2023 – 08/2023

#### Software Engineer

- Spearheaded improvements to the flagship application (Supervisor®), a satellite-based vehicle tracking distributed system, ensuring high availability, reliability, and optimal performance.
- Conducted comprehensive maintenance and performance optimizations, successfully refactoring legacy code to align with modern C++ standards and industry best practices.
- Streamlined development processes by deploying Continuous Integration and server monitoring systems, leveraging Docker containers for deployment and management.
- Implemented robust unit and integration testing frameworks, resulting in enhanced code quality and increased software reliability.
- Utilized concurrent programming techniques such as threads, semaphores, monitors, and more to optimize application performance and responsiveness.
- Implemented interprocess communication mechanisms using sockets, pipes, and other technologies to enable seamless communication between application components.

### Laboratory of Simulation and Control of Aerospace Systems, *University of Brasília*

04/2021 – 03/2023

#### Undergraduate Research Fellow

- Hardware-in-the-loop tests for attitude estimation and control by magnetic actuation.
- Implementation of optimization and stochastic filtering algorithms to estimate the attitude of the AlfaCrux satellite.
- Assembly and operation of the LODESTAR ground station.

### International Center of Condensed Matter Physics, *University of Brasília*

06/2020 - 06/2021

#### Undergraduate Research Assistant

- Analytical solution of the noncommutative Schrodinger equation for Coulomb potential.
- Determination of the energy levels for the Hydrogen Atom and comparison with experimental data.
- Estimation of a bound on the noncommutativity parameter using the results and experimental data.

### E-lastic

02/2022 – 06/2022

#### Hardware Development Intern

- Hardware development, testing and manufacturing for IoT applications and automations.
- Development and execution of test protocols for the dynamometer PCBs, batteries and load cells (post R&D).
- Documentation and updating of assembly processes, diagnosis and maintenance of malfunctioning dynamometers.
- Participation in the assembly processes, quality control and planning of the assembly line layout.
- Firmware development and update for ESP32 and Nordic NRF52832.

---

## TEACHING EXPERIENCE

### Dept. of Electronics Engineering

#### Federal University of Minas Gerais

- 2024 – ongoing      Guest lecturer in Control of Linear Systems
- 2025 – ongoing      Teaching assistant in Control of Linear Systems
- 2024                    Teaching assistant in Feedback Control Laboratory

### School of Mechanical Engineering

#### Georgia Institute of Technology

- 2023                    Teaching assistant in Introduction to Engineering Graphics and Visualization

### Dept. of Electrical Engineering

#### University of Brasília

- 2022 – 2023      Teaching assistant in Digital Control
- 2021                    Teaching assistant in Feedback Control of Dynamic Systems
- 2020                    Teaching assistant in Electric Circuits 1

### Dept. of Mathematics

#### University of Brasília

- 2018                    Teaching assistant in Single Variable Calculus
